

Research Participants needed

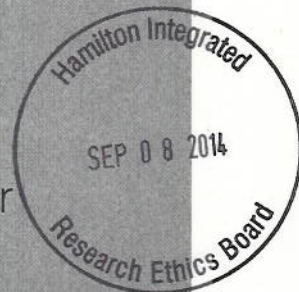

The iGAP Study Improving General Practice Advance Care Planning

We are surveying **physicians, nurses and allied health professionals in Primary Care Practices** about Advance Care Planning (ACP)

To determine:

- The importance of various barriers to engaging your patients in ACP;
- Your suggestions to improve ACP with your patients and their families;
- Your perceived role and the role that others may play in communication and decision-making about ACP with your patients and their families.

Eligible health care professionals will be invited to participate by paper and electronic survey
